

## First go to your instagram profile and click edit profile

## Next click on “switch to professional account”

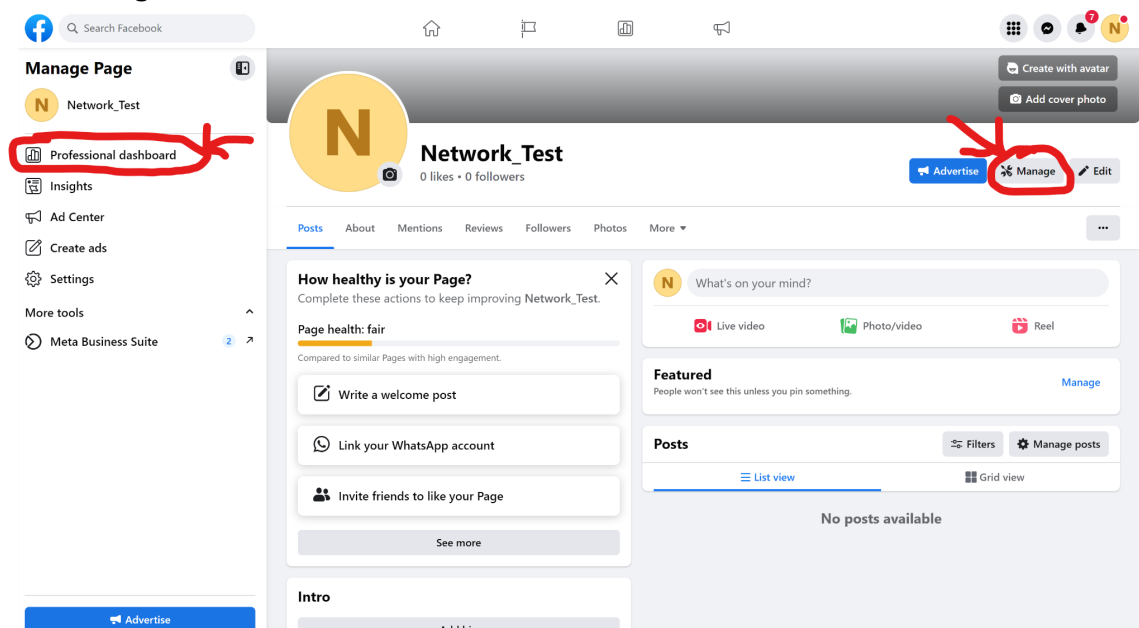

**From there click “business account”**

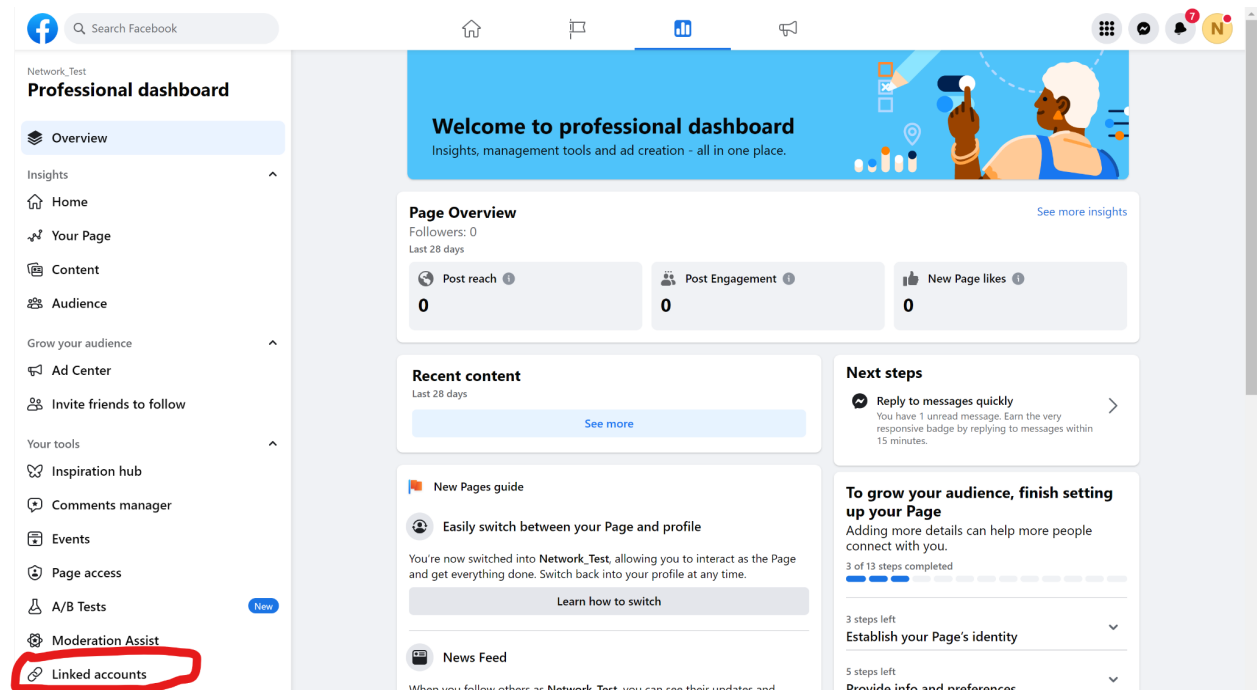

**From there you can follow the instructions on the page. Set the type of account to anything you want, it doesn't matter.**

**Next go to facebook and if you don't have a page already, create one.**

**After that go to the page in facebook and click either “professional dashboard” or “manage”**

## From there click on “linked accounts”

## Then simply connect your instagram business account
